

## **TACK-ON-PRESSURE FILMS FOR TEMPORARY SURFACE PROTECTION AND SURFACE MODIFICATION**

### **ABSTRACT**

5        A method for temporary surface protection or surface modification using a sheet material is disclosed. In the inventive method, a selectively activated adhesive is provided on one side of a three-dimensional sheet material for maintaining the sheet material in place for uses such as the dental bib, tool tray liner, or providing desired optical effects on a surface to which the sheet

10      material has been adhered.
